

Automatic bag inserter machine. A ready made bag is picked up from a bag store, opens and inserts the bag automatically into a erected case.

This bag-to-bag system allows 24 hours non stop due to the fact it is not necessary to stop the machine during the load bags into the bag store. The inserter machine can reach speeds of up to 10 boxes per minute.

**TECHNICAL DESCRIPTION**

**DATA SHEET**

* Other sizes of boxes under study	
CASE RANGE (minimun)	300 x 250 x 150 mm
CASE RANGE (maximun)	650 x 450 x 500 mm
Speed up to	10 cycles per minute
Bag material	HDPE, LDPE, blends and co-extrusions
Electric	1Kw (3P + N)
Pneumatics	6 bar
Finish	Painting cover ( steel) or stainless steel
Machine Handing	right to the left, left to the right
Machine dimensions	L x W x H 1.200 x 1.600 x 2.900 (mm)

- PLC control (SIEMENS)
- Wide range of case dimensions
- Prefabricated bags
- Double bag magazine
- Vertical movement: SERVO (SIEMENS)
- Bag Opening: PNEUMATICAL
- Case conveyer by round belts
- Color touch screen
- quickly and easy manual regulation of cases
